THUMB WHEEL SWITCHES

Ideal solution for setting addresses or parameters in slim DIN-rail housings

THUMB WHEEL SWITCHES

Thumb wheel switches are an ideal solution for setting addresses or parameters in slim DIN-rail housings, e.g. setting parameters in engine control units, motor starters or current limiting applications as well as setting addresses in BUS- or Wireless applications.

Thumb wheel switches can easily be operated without tool by an optional operating crown. The operating notches separate switching positions clearly, so set positions are easy to read. The position printing on the wheel can be done according to customer specifications.

HIGHLIGHTS

- » Thumb wheel switches with and without operating crown
- » Width starting from 3.3 mm
- » Versions with 10, 16 and 32 positions
- » For slim DIN-rail housings from 6.2 mm width
- » For right or left hand side PCB
- » Customer specific printing

NAME	FEATURE	IMAGE		DIMENSIONS
		for PCB right	for PCB left	
DH1	10 positions without operating crown			
DH1	10 positions with operating crown			
DH1	16 positions with operating crown			
DH2	10 positions without operating crown			
DH2	16 positions without operating crown			
DH5	32 positions with operating crown			

PTR HARTMANN

A Phoenix Mecano Company

A COMPANY IN THE PHOENIX MECANO GROUP

The Phoenix Mecano Group is a technological enterprise which operates around the world and is represented on the international growth markets. With its three building technology, mechanical components and ELCOM / EMS divisions, the company is the leader in many markets. Machinery and plant engineering, measurement and control technology, electrical engineering, automotive and rail engineering, energy technology, medical technology, aerospace technology, as well as the home and hospital care sector, are important fields of application.

GLOBAL PRESENCE

With more than 60 locations on every continent, we and our international workforce are close to our customers and guarantee efficient production, resource-friendly logistics and market-driven solutions.
